SUMMARY

DevOps Engineer with 1+ years of experience migrating CI/CD pipelines across 9+ enterprise platforms with zero downtime, integrating Black Duck and Fortify security scans, and converting legacy pipelines to Pipeline-as-Code (SCM). Skilled in Jenkins, Git, Docker, and CI/CD automation, with hands-on experience improving pipeline performance and reliability in enterprise environments.

EDUCATION

National Institute of Technology, Srinagar

Bachelor's Degree in Information Technology
2021 – 2025

SKILLS

- CI/CD pipelines with Jenkins (Declarative & Scripted, Shared Libraries), Groovy
- Containerization with Docker, Docker Compose
- Artifact management with JFrog Artifactory
- Cloud platforms: AWS (EC2, S3, IAM, VPC)
- Version control and collaborative workflows: Git, GitHub, GitLab
- REST APIs, Webhooks, Pipeline-as-Code (SCM), Automation
- Linux administration and shell scripting (Bash)
- *Currently learning:* Kubernetes, Terraform

CERTIFICATIONS

- AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

DevOps Engineer

Sutherland | July 2025 – Present

- Migrated CI/CD for 9+ enterprise platforms from Tracfone to Verizon Jenkins with zero downtime
- Integrated Black Duck & Fortify security scans into pipelines across 6+ platforms
- Converted legacy pipelines to Pipeline-as-Code (SCM) for 4 platforms, improving rollback control
- Optimized Jenkins branch-selector via GitLab API pagination, cutting load time from 60s to near-instant
- Resolved dev-to-prod pipeline issues via Slack, coordinating fixes with app teams to unblock releases

PROJECTS

Profile App – End-to-End Jenkins CI/CD Pipeline 🔗

Full-stack app (Node.js, React, MongoDB) containerized with Docker Compose; built a Jenkins pipeline to build, push, deploy, health-check, and email notification on every release.

Jenkins Webhook PR Conflict Detector 🔗

GitHub webhook-triggered Jenkins pipeline that auto-detects PR merge conflicts using the GitHub API and flags the exact conflicted files.
