PROFESSIONAL SUMMARY

DevOps Engineer with 1+ years of experience in Continuous Integration / Continuous Deployment (CI/CD), build and release automation, and pipeline security. Migrated CI/CD for 9+ enterprise platforms between Jenkins environments with zero downtime, integrated Black Duck and Fortify vulnerability scanning into pipelines across 6+ platforms, and converted legacy pipelines to Pipeline as Code (SCM). Hands-on with Jenkins, Docker, Kubernetes, Terraform (Infrastructure as Code), AWS, Git, Python and Bash on Linux. AWS Certified Cloud Practitioner.

TECHNICAL SKILLS

- **Cloud & Platforms:** Amazon Web Services (AWS), EC2, S3, IAM, VPC, CloudWatch
- **CI/CD & Build Tools:** Continuous Integration / Continuous Deployment (CI/CD), Jenkins, Jenkinsfile, Declarative Pipelines, Scripted Pipelines, Shared Libraries, Pipeline as Code (SCM), Webhooks, JFrog Artifactory
- **Containers & Orchestration:** Docker, Docker Compose, Containerization, Kubernetes
- **Infrastructure as Code:** Infrastructure as Code (IaC), Terraform, AWS CloudFormation
- **Scripting & Languages:** Python, Bash, Shell Scripting, Groovy, YAML, JavaScript (Node.js, React), C++, REST APIs, Linux Administration
- **Monitoring & Observability:** AWS CloudWatch, Health Checks, Email Alerting
- **Version Control & Security:** Git, GitHub, GitLab, Branching, Pull Requests, Black Duck (Software Composition Analysis, SCA), Fortify (Static Application Security Testing, SAST), Vulnerability Scanning, Access Control

PROFESSIONAL EXPERIENCE

Associate DevOps Engineer, Sutherland Global Services

July 2025 – Present

Hyderabad, Telangana

- Migrated Continuous Integration / Continuous Deployment (CI/CD) for 9+ enterprise platforms from Tracfone Jenkins to Verizon Jenkins with zero downtime, by moving build and deployment pipelines between Jenkins environments.
- Enabled developer teams to work on migrated Jenkins platforms without delays, by configuring access control, resolving access requests, and responding to Slack and call requests.
- Reduced security risk across 6+ platforms, by integrating Black Duck (SCA) and Fortify (SAST) vulnerability scanning into Jenkins build pipelines.
- Improved rollback control and upgrade handling on 4 platforms, by converting legacy pipelines to Pipeline as Code (SCM) using Jenkinsfile.
- Cut Jenkins branch-selector load time from 60 seconds to near-instant, by implementing GitLab API pagination and descending sort on branch data.
- Resolved a payment-portal deployment issue (application.yaml max-lifetime setting) on Kubernetes, by troubleshooting with the Kubernetes team and guiding developers on default values through to resolution.

PROJECTS

Profile App – End-to-End Jenkins CI/CD Pipeline | github.com/12pavani/jenkins-gsl-profileApp

- Containerized a full-stack application (Node.js, React, MongoDB), by writing Dockerfiles and a Docker Compose setup.
- Automated build-to-release on Kubernetes, by creating a Jenkins pipeline covering build, image push, deploy, health check and email alerting.

Jenkins Webhook PR Conflict Detector | github.com/12pavani/Webhook-Learn

- Automated merge-conflict detection on Git pull requests, by triggering a Jenkins pipeline from GitHub webhook events.
- Identified the exact conflicted files, by calling the GitHub API from the pipeline.

EDUCATION

National Institute of Technology, Srinagar

2021 – 2025

Bachelor's Degree in Information Technology

CERTIFICATIONS

AWS Certified Cloud Practitioner
